## Impala Platinum's 14 Shaft – methane explosion

EMBARGO: For immediate release

<p><b>Ticker symbols:</b> JSE: Imp LSE: Ipla ADRs: Impuy</p> <p><b>www.implats.co.za</b></p> <p><b>Queries:</b></p> <p><b>Jon Andrews</b> Group Executive: Health, Safety and Environment</p> <p>+27 14 569 6653 +27 82 807 2131</p> <p><b>Paul Dunne</b> Group Executive: Operations</p> <p>+27 14 569 6653 +27 82 808 8364</p>	<p>Impala Platinum Holdings Limited (Implats) regrets to advise that a methane explosion took place at 14 Shaft at its Rustenburg operations on Wednesday, 9 September 2009. The incident took place in the conventional mining section of the shaft. At this stage the cause of the explosion has not been determined.</p> <p>Three employees were injured and have been admitted to the Burns Unit at Milpark Hospital, Johannesburg. They are in a critical but stable condition.</p> <p>Management, together with the DMR are currently investigating the incident. All operations have been suspended at 14 Shaft.</p> <p>No further information can be released by the company until the investigation has been completed.</p> <p style="text-align: right;">[ends]</p>
