

WATER POLICY STATEMENT

Implats is a leading producer of platinum group metals (PGMs). The Group undertakes its operating activities in a way that strives to maximise the positive impacts PGMs have on the environment and minimise or eliminate any negative impacts. Implats is committed to responsible water stewardship. Water is a finite resource, access to which is a fundamental human right. Equitable and secure access to water is a significant environmental and socio-economic development concern.

Implats is committed to:

- Complying with the applicable water-related legislation and water-related obligations at all its managed and joint venture operations
- Acknowledging shared responsibility of water resources, which is essential to business sustainability and the wellbeing of the communities in which we operate
- Implementing and integrating water stewardship across operations and the surrounding areas
- Executing strategic and operational decisions informed by water constraints and targets
- Being transparent and constructive in interactions with its broader stakeholder universe regarding water-related issues
- Efficiently and effectively optimising water use, and promoting recycling opportunities to ensure the use of recycled water is prioritised at operations
- Ensuring that initiatives are in place to achieve water targets, and publicly reporting on progress against these targets
- Implementing processes to review and revise targets
- Establishing monitoring and evaluation processes to track water-related activities
- Responding to water-related risks and opportunities
- Ensuring that standards and procedures are aligned with legislative requirements
- Providing leadership and support in achieving these commitments;
- Participating at relevant catchment forums.

Employees and contractors working at Implats' operations play a fundamental role in achieving water-related objectives through:

- Taking ownership of, and participating in water management programmes and awareness initiatives
- Integrating water concerns into everyday practices.

Nico Muller – Chief Executive Officer
